## Protect Your Investment in Your Floor with this Innovative Coating

**Skudo Floor** is an amazing new product that was designed to overcome the issues surrounding damage to finished surfaces during the construction phase.

**Skudo Floor** is a hard-wearing peelable coating that temporarily adheres directly to the surface, forming a continuous outer skin protecting it from damage and stains. It peels off upon job completion leaving the surface clean and saving you time and money spent on costly repairs that could have been avoided.

If you have ever had to deal with damages to a finished floor or surface caused by various tradesmen, you will see the value in this product.

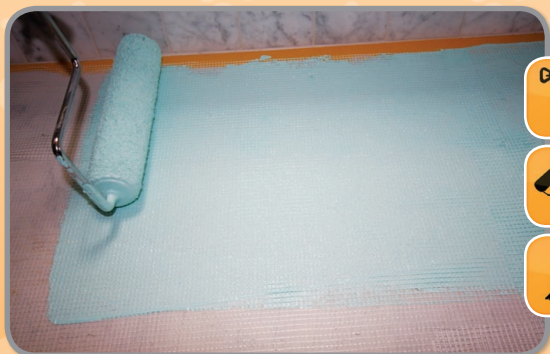

Protect Your Finished Surface  
from Costly Site Damage

Finished Surface Left Clean

### Quick and Easy Application

Skudo is simply applied by brush, roller or airless spray gun.

Skudo simply peels off for disposal, leaving the floor clean after work is complete.

## Paint-on, Peel-off Protection for Your Flooring
